McDill Inland Lake Protection & Rehabilitation District Burning on Ice Restriction

Whereas McDill Pond is a 262 acre impoundment of the Plover River located in Portage County WI in the City of Stevens Point and Village of Whiting.

Whereas McDill Inland Lake Protection and Rehabilitation District is a recognized lake district in the state of Wisconsin composed of the waterfront properties on McDill Pond with the purpose of protecting McDill Pond.

Whereas a DNR water monitoring study conducted starting in 2013 through present has found high amounts of Nitrogen in McDill Pond that has fueled excessive plant growth. The high amounts of nitrogen concluded from the study is entering McDill Pond through groundwater, and direct runoff from surrounding land bordering McDill Pond.

Whereas McDill Inland Lake Protection and Rehabilitation District hereby recognizes the needs for control of all nutrients entering in McDill Pond to protect the waterbody from excessive plant and algae growth that is detrimental to the health of McDill Pond.

NOW, THEREFORE, BE IT RESOLVED THAT McDill Inland Lake Protection and Rehabilitation District hereby enacts a burning on the ice without a container restriction for all accessing McDill Pond during times of ice cover to limit nutrient overload into the waterbody. Burning of material may be done in a container on the ice that does not allow ashes to fall on the ice. All ash and any other material must be disposed of off the waterbody where the nutrient runoff will not run back into McDill Pond.

Adopted this 13th day of October 2015
