IP-WC-2020-50-02662

Krista Olson  
3317 Della Street  
Stevens Point, WI 54481

Dear Ms. Olson:

The Department of Natural Resources has completed its review of your application for a permit to remove materials from the bed of McDill Pond, in the City of Stevens Point, Portage County. You will be pleased to know your application is approved.

I am attaching a copy of your permit, which lists the many important conditions that must be followed to protect water quality and habitat. A copy of the permit must be posted for reference at the project site. Please read your permit conditions carefully so that you are fully aware of what is expected of you.

Please note you are required to submit photographs of the completed project within 7 days after you've finished construction. This helps both of us to document the completion of the project and compliance with the permit conditions.

Your next step will be to notify me of the date on which you plan to start construction and again after your project is complete.

If you have any questions about your permit, please call me at (715) 596-0110 or email [KatieM.Mallum@wisconsin.gov](mailto:KatieM.Mallum@wisconsin.gov).

Sincerely,

Katie Mallum  
Water Management Specialist

cc: Kyle Bretl, GEI Consultants, Inc.

**STATE OF WISCONSIN  
DEPARTMENT OF NATURAL RESOURCES**

**Dredging PERMIT  
IP-WC-2020-50-02662**

Krista Olson, McDill Lake Protection and Rehabilitation District, is hereby granted under Section 30.20(2), Wisconsin Statutes, a permit to remove materials from the bed of McDill Pond, in the City of Stevens Point, Portage County, also described as being in the NE1/4 of the NW1/4 of Section 03, Township 23 North, Range 08 East, subject to the following conditions:

**PERMIT**

1. You must notify Katie Mallum at phone (715) 596-0110 or email [KatieM.Mallum@wisconsin.gov](mailto:KatieM.Mallum@wisconsin.gov) before starting construction and again not more than 5 days after the project is complete.
2. You must complete the project as described **on or before 11/9/2023**. If you will not complete the project by this date, you must submit a written request for an extension prior to expiration of the initial time limit specified in the permit. Your request must identify the requested extension date. The Department shall extend the time limit for an individual permit or contract for no longer than an additional 5 years if you request the extension before the initial time limit expires. You may not begin or continue construction after the original permit expiration date unless the Department extends the permit in writing or grants a new permit.
3. This permit does not authorize any work other than what you specifically describe in your application and plans, and as modified by the conditions of this permit. If you wish to alter the project or permit conditions, you must first obtain written approval of the Department.
4. Before you start your project, you must first obtain any permit or approval that may be required for your project by local zoning ordinances and by the U.S. Army Corps of Engineers. You are responsible for contacting these local and federal authorities to determine if they require permits or approvals for your project. These local and federal authorities are responsible for determining if your project complies with their requirements.
5. Upon reasonable notice, you shall allow access to your project site during reasonable hours to any Department employee who is investigating the project's construction, operation, maintenance or permit compliance.
6. The Department may modify or revoke this permit for good cause, including if the project is not completed according to the terms of the permit or if the Department determines the activity is detrimental to the public interest.
7. You must post a copy of this permit at a conspicuous location on the project site, visible from the waterway, for at least five days prior to construction, and remaining

at least five days after construction. You must also have a copy of the permit and approved plan available at the project site at all times until the project is complete.

8. Your acceptance of this permit and efforts to begin work on this project signify that you have read, understood and agreed to follow all conditions of this permit.
9. You must submit a series of photographs to the Department, within one week of completing work on the site. The photographs must be taken from different vantage points and depict all work authorized by this permit.
10. You, your agent, and any involved contractors or consultants may be considered a party to the violation pursuant to Section 30.292, Wis. Stats., for any violations of Chapter 30, Wisconsin Statutes, or this permit.
11. Construction shall be accomplished in such a manner as to minimize erosion and siltation into surface waters. Erosion control measures (such as silt fence and straw bales) must meet or exceed the technical standards of ch. NR 151, Wis. Adm. Code. The technical standards are found at:  
[http://dnr.wi.gov/topic/stormwater/standards/const\\_standards.html](http://dnr.wi.gov/topic/stormwater/standards/const_standards.html)
12. All of the removed materials must be placed in the location shown on applicant's plan.
13. You are required to install a silt curtain or other erosion control in the waterway around your project during dredging.
14. You must dredge to the dimensions and elevations shown on your approved plans – See figure 9 – cross sections.
15. You must not deposit or store any of the removed materials in any wetland or below the ordinary high watermark of any waterway. All removed materials must be placed out of the floodway of any stream.
16. This permit complies with the substantive requirements of s. 23.24, Stats. and NR 109, Adm. Code
17. Bottom materials must be removed by equipment, which is designed to minimize the amount of sediment that can escape into the water. Equipment must be properly sized so that excavation conforms to the plans submitted and allows the work to be done from the banks rather than in the waterway.
18. To protect fish habitat during spawning seasons, the dredging may not occur during the following time periods: - For all waters located south of state highway 29, March 15 through May 15.

19. All equipment used for the project including but not limited to tracked vehicles, barges, boats, hoses, sheet pile and pumps shall be de-contaminated for invasive and exotic viruses and species prior to use and after use.

The following steps must be taken every time you move your equipment to avoid transporting invasive and exotic viruses and species. To the extent practicable, equipment and gear used on infested waters shall not be used on other non-infested waters.

1. **Inspect and remove** aquatic plants, animals, and mud from your equipment.
2. **Drain all water** from your equipment that comes in contact with infested waters, including but not limited to tracked vehicles, barges, boats, hoses, sheet pile and pumps.
3. **Dispose** of aquatic plants, animals in the trash. Never release or transfer aquatic plants, animals or water from one waterbody to another.
4. **Wash your equipment** with hot (>140° F) and/or high pressure water,  
- OR -

Allow your equipment to **dry thoroughly for 5 days.**

#### FINDINGS OF FACT

1. Krista Olson has filed an application for a permit to remove materials from the bed of McDill Pond, in the City of Stevens Point, Portage County, also described as being in the NE1/4 of the NW1/4 of Section 03, Township 23 North, Range 08 East.
2. McDill Lake Protection and Rehabilitation District is proposing to dredge McDill Pond. The project needs to occur because the pond retains sediment due to the presence of a dam and dredging of the pond is required for continual maintenance. The plan is to hydraulically dredge the areas referenced on the plans (See figure 8 – plan view - approx. 18.48 acres) and place the spoils in an upland location. Temporary erosion control measures may include turbidity barriers, silt curtains, silt fences, sediment bale barriers, and temporary seeding of the soil stockpile. Permanent erosion control measures will include seeding any disturbance within the soil stockpile area to prevent future erosion or releases of sediment.
3. The Department has completed an investigation of the project site and has evaluated the project as described in the application and plans.
4. McDill Pond is a navigable water (and no bulkhead exists at the project site.)

5. The proposed project, if constructed in accordance with this permit will not adversely affect water quality, will not increase water pollution in surface waters and will not cause environmental pollution as defined in s. 283.01(6m), Wis. Stats.
6. The proposed project will not impact wetlands if constructed in accordance with this permit.
7. The Department of Natural Resources has determined that the agency's review of the proposed project constitutes an equivalent analysis action under s. NR 150.20(2), Wis. Adm. Code. The Department has considered the impacts on the human environment, alternatives to the proposed projects and has provided opportunities for public disclosure and comment. The Department has completed all procedural requirements of s. 1.11(2)(c), Wis. Stats., and NR 150, Wis. Adm. Code for this project.
8. The Department of Natural Resources and the applicant have completed all procedural requirements and the project as permitted will comply with all applicable requirements of Sections 30.20(2), Wisconsin Statutes and Chapters NR 102, 103, of the Wisconsin Administrative Code.
9. The structure or deposit will not be detrimental to the public interest.
10. The activity will not cause environmental pollution as defined in s. 299.01(4).
11. No material injury will result to the riparian rights of any riparian owners of real property that abuts any water body that is affected by the activity.

#### CONCLUSIONS OF LAW

1. The Department has authority under the above indicated Statutes and Administrative Codes, to issue a permit for the construction and maintenance of this project.

#### NOTICE OF APPEAL RIGHTS

If you believe that you have a right to challenge this decision, you should know that the Wisconsin statutes and administrative rules establish time periods within which requests to review Department decisions shall be filed. For judicial review of a decision pursuant to sections 227.52 and 227.53, Wis. Stats., you have 30 days after the decision is mailed, or otherwise served by the Department, to file your petition with the appropriate circuit court and serve the petition on the Department. Such a petition for judicial review shall name the Department of Natural Resources as the respondent.

To request a contested case hearing of any individual permit decision pursuant to section 30.209, Wis. Stats., you have 30 days after the decision is mailed, or otherwise served by the Department, to serve a petition for hearing on the Secretary of the Department of Natural Resources, P.O. Box 7921, Madison, WI, 53707-7921. The

petition shall be in writing, shall be dated and signed by the petitioner, and shall include as an attachment a copy of the decision for which administrative review is sought. If you are not the applicant, you must simultaneously provide a copy of the petition to the applicant. If you wish to request a stay of the project, you must provide information, as outlined below, to show that a stay is necessary to prevent significant adverse impacts or irreversible harm to the environment. If you are not the permit applicant, you must provide a copy of the petition to the permit applicant at the same time that you serve the petition on the Department.

**The filing of a request for a contested case hearing is not a prerequisite for judicial review and does not extend the 30 day period for filing a petition for judicial review.**

A request for contested case hearing must meet the requirements of section 30.209, Wis. Stats., and sections NR 2.03, 2.05, and 310.18, Wis. Admin. Code, and if the petitioner is not the applicant the petition must include the following information:

1. A description of the objection that is sufficiently specific to allow the department to determine which provisions of this section may be violated if the proposed permit or contract is allowed to proceed.
2. A description of the facts supporting the petition that is sufficiently specific to determine how the petitioner believes the project, as proposed, may result in a violation of Chapter 30, Wis. Stats.;
3. A commitment by the petitioner to appear at the administrative hearing and present information supporting the petitioner's objection.

If the petition contains a request for a stay of the project, the petition must also include information showing that a stay is necessary to prevent significant adverse impacts or irreversible harm to the environment.

Dated at Wausau Service Center, Wisconsin on 11/9/2020.
